# Worried about field failures? DTB can help.

## Have Product Confidence

DTB's Environmental Stress Screening (ESS) is the path to product surety. ESS is a series of intensified tests to identify potential manufacturing flaws and, by utilizing temperature and vibration to accelerate failure at weak points, short-lived units are removed so only the highest quality product is shipped to your customers.

## Enjoy Unmatched Support

Our experts will work with you to design an ESS test that accurately simulates the working conditions of your product. By combining multiple environmental factors into a single test, we will help you meet your project requirements, saving time, money, and avoiding potential product failures.

## ESS Benefits

- Provides a cost-effective quality control process that helps catch defects early
- Increased reliability translates to reduced in-field troubleshooting and increased customer satisfaction
- Ensures compliance with customer requirements and regulatory standards

## Choose DTB for your ESS needs

- Experienced staff
- Immediate availability
- Quick turn capability
- Total support for all testing
- Fast compliance reporting
- Competitive pricing
